# Hawaii Environmental Health Portal

- One-to-One:
  - Making Connections
- One Focus:
  - Accurate, Efficient and Transparent
- One Directory:
  - To all servicing systems provided by Hawaii Dept. of Health Environmental Health Administration

# Hawaii Environmental Health Portal

- **Publicly Accessible**
  - No login required for public systems.
- **Secure**
  - Additional authentication available for systems that require more security.
- **Growth**
  - Listing will expand as EHA makes more systems available to the public.

# Hawaii Environmental Health Portal

- Current Listing (Public)
  - e-Permitting Portal
  - Environmental Health Warehouse
  - Groundwater Contamination Viewer
  - Water Pollutant Control Viewer
  - Water Quality Alerts
  - Water Quality Monitoring Sites

Systems

[Environmental Health Warehouse \[Public\]](#)

The Environmental Health Warehouse (EHW) provides easy access to regulated facilities and locations having environmental health impacts within their own communities. Information about hazardous waste sites, underground storage tanks, polluted water discharge points, and other permitted entities is readily available.

[e-Permitting Portal](#)

The e-Permitting Portal assists public and industry stakeholders with permitting matters. Applicants can quickly determine their permitting requirements by navigating consistently organized and consolidated information, prepare and submit online applications, make secure electronic fee payments, and stay informed during processing of their submitted permit application submissions.

[Groundwater Contamination Viewer](#)

The Groundwater Contamination Viewer uses monitoring data for public drinking water wells, select non-potable wells, fresh water springs, and other testing data available to the DOH. The system identifies organic and other chemical contaminants that have been detected and confirmed in drinking water wells, select non-potable wells, and fresh water springs throughout Hawaii.

[Hawaii Emergency Response Exchange](#)

Hawaii Environmental Health Emergency Response Exchange is a self-installing, self-maintaining application intended for emergency responders. The HERE Client is available by clicking on the Download button. Appropriate credentials are required to gain access to Hawaii Environmental Health data. Requests can be made through the installation of the HERE Client and also by email to [node@doh.hawaii.gov](mailto:node@doh.hawaii.gov) or [elaine.lake@doh.hawaii.gov](mailto:elaine.lake@doh.hawaii.gov)

[Hawaii State and Local Emission Inventory System](#)

Hawaii SLEIS allows regulated entities to submit point source air emissions inventory data and related information to State and Federal Environmental Agencies.

[Water Pollution Control Viewer](#)

The Water Pollution Control (WPC) Viewer offers quick and easy access to NPDES permits, inspections and enforcement actions.

[Water Quality Data](#)

Water quality data as provided by the Clean Water Branch.
